HTML5 · CSS3 · JavaScript · React · Next.js · TypeScript · Tailwind CSS · Supabase · Git · GitHub · Responsive Web Design · REST/API Integration · Database Integration

Productivity & Automation

Google Workspace · Trello · Asana · ClickUp · Monday.com · Slack · Zoom · Zapier · Calendly · Picktime

Digital & Content Tools

Canva · Adobe Photoshop · Adobe Illustrator · CapCut · Adobe Premiere Pro · InShot

PROJECT EXPERIENCE

FleetTrack — Fleet Management Web Application

Web Development Project | Next.js, React, TypeScript, Tailwind CSS, Supabase

- Designed and developed a fleet management web application for vehicle owners and fleet managers.
- Built a responsive interface for vehicle registration and fleet management with modal-based forms.
- Integrated the application with Supabase for database operations — created and connected a vehicles database table.
- Worked with Next.js 16.3.1 and the Turbopack development environment.
- Implemented form state management and asynchronous database operations.
- Resolved real-world database, authentication, environment variable, API key, and foreign key issues during development.
- Used Git/GitHub and Vercel-related deployment workflows throughout the development process.

Freshdesk Support System — Stylex Systems Limited

Customer Support / Helpdesk Project

- Set up a complete customer support workflow using Freshdesk for an edtech platform.
- Configured support environment for receiving and managing customer tickets.
- Connected company support inbox to helpdesk workflow — configured email forwarding and tested ticket submission.
- Integrated the Freshdesk support widget with a Blogspot website.
- Tested the complete customer support workflow by submitting and responding to a live ticket.
- Created supporting website pages including Courses, Privacy Policy, and Terms of Service.

Airtable Job Application System

Workflow & Data Management Project

- Structured and managed job application information using Airtable.
- Organized applicant records including names, emails, positions, CVs, and application fields.
- Identified and resolved field-mapping issues within the application workflow.
- Worked with structured records and form-based data collection.

Personal Portfolio Website

Web & Digital Project | Next.js, React, Tailwind CSS, GitHub, Vercel

- Designed and developed a professional personal portfolio showcasing services, skills, projects, and case studies.
- Created sections for services, skills and tools, projects, about information, and contact details.
- Added downloadable project case studies and configured custom favicon and SEO updates.
- Used GitHub for source code management and Vercel for deployment.

EDUCATION & TRAINING

Digital Twitch

Student / Professional Training

Training and practical development across virtual assistance, digital tools, administrative workflows, and technology.

Secondary School Certificate (WAEC) | *Learning Field International School, Nigeria · 2023*
